Basic if statements

Look at this code:

```python
num = int(input("Enter a number: "))
if num > 10:
    print("Over 10")
```

Complete these programming challenges and save each of them with a sensible name:

Challenge 1

Ask the user for their age. If they are 18 or older tell them "You can vote".

Challenge 2

Ask the user to enter a password. If they enter "letmein", display the message "access granted".

Challenge 3

Create a Python program for this flow diagram:

Python Programming
