If...else statements

Look at this code:

```python
num = int(input("Enter a number: "))
if num > 10:
    print("Over 10")
else:
    print("Not over 10")
```

Complete these programming challenges and save each of them with a sensible name:

Challenge 1

Ask if the user likes pizza. If they answer "yes" display "I like pizza too", otherwise display "My favourite food is pizza."

Challenge 2

Change your password program you created earlier. If they enter "letmein", display the message "access granted" otherwise display "access denied".

Challenge 3

Create a Python program for this flow diagram:
